

MPAA COMMENTS, 5/29/2002, ON COMPLIANCE REQUIREMENTS

X.3 Compliance Requirements: Unscreened Content.¹³

(a) A Covered Product shall not pass, or direct to be passed, Unscreened Content to any output except

(1) to an analog output;

(2) [to the output of an 8-VSB, 16-VSB, 64-QAM, or 256-QAM modulator included in such Covered Product: (A) that, if capable of receiving and modulating any content from non-trusted sources other than Unscreened Content or Marked Content (e.g., any content received through an unprotected analog or digital input) (“Unknown Content”); (A) does not output such Unknown Content from a non-trusted source unless it first inspects the EIT and PMT and determines that the Broadcast Flag is not present in such Unknown Content; and (B) which Covered Product and modulator is are not capable of itself-themselves inserting the Broadcast Flag in such Unknown Content from a non-trusted source;]^{14,15}

...

X.4 Compliance Requirements: Marked Content.

(a) A Covered Product shall not pass, or direct to be passed, Marked Content to any output except

(1) to an analog output;

(2) [to the output of an 8-VSB, 16-VSB, 64-QAM, or 256-QAM modulator included in such Covered Product: (A) that, if capable of receiving and modulating any content from non-trusted sources other than Unscreened Content or Marked Content (e.g., any content received through an unprotected analog or digital input) (“Unknown Content”); (A) does not output such Unknown Content from a non-trusted source unless it first inspects the EIT and PMT and determines that the Broadcast Flag is not present in such Unknown Content; and (B) which Covered Product and modulator are is not capable of itself-themselves inserting the Broadcast Flag in such Unknown Content from a non-trusted source;]^{16,17}

...

¹³ No requirements or limitations are imposed by this Section X with respect to the output, recording, or other handling of content other than Unscreened Content and Marked Content.

¹⁴ ~~Revised W~~wording proposed by the MPAA members companies; upon the express condition that to be discussed. Note that the MPAA member companies believe that certain the same requirements are imposed must be promulgated on all such 8-VSB, 16-VSB, 64-QAM, and 256-QAM modulators, in order to avoid use of the requirements of this Section X to bypass other content protection systems (see BPDG Report, section 5.9).

¹⁵ A few participants have proposed that such permitted output be listed on Table A as an Authorized Digital Output Protection Technology (see BPDG report, section 5.8).

¹⁶ ~~Revised W~~wording proposed by the MPAA members companies upon the express condition that, to be discussed. Note that the MPAA member companies believe that certain the same requirements are imposed must be promulgated on all 8-VSB, 16-VSB, 64-QAM, and 256-QAM ~~such~~ modulators, in order to avoid use of the requirements of this Section X to bypass other content protection systems (see BPDG Report, section 5.9).

¹⁷ A few participants have proposed that such permitted output be listed on Table A as an Authorized Digital Output Protection Technology (see BPDG report, section 5.8).
